

INTERACTIVE VIDEO LESSONS

Everyone has different learning styles and preferences. Interactive video lessons offer a more engaging learning experience therefore leading to better retention of content and a positive impact on your training investment.

BENEFITS OF INTERACTIVE VIDEO

- Promotes active learning during the lesson
- Increases engagement with the learning process
- Requires the learner to meaningfully interact with training content before a lesson can be completed
- Increases learning retention
- Increases ROI of your training program

BEST USE CASES

- When a learner prefers interacting with training activities rather than just listening or viewing content.
- Use for topics that require the learners full attention to progress through the learning content.
