

BizLibrary Content Solutions

Every L&D team is being asked to do more with less. More topics to cover, more employees to reach, and less time and budget to do it. BizLibrary gives you a complete content solution for every situation – expert-built courses ready to assign today, customization tools to make content your own, and AI-powered creation that turns your existing materials into polished training in minutes.

Your Content Options

Off-the-Shelf Content: Expert Learning, Ready to Go

The BizLibrary Collection includes thousands of ready-to-use video lessons spanning hundreds of topics – from compliance and safety to leadership, communication, and professional development. Every lesson is crafted by subject-matter experts and continuously reviewed and refreshed to reflect the realities of the modern workplace.

Customized Content: Make It Feel Like Yours

Take BizLibrary Productions content and tailor it – update descriptions, adjust quiz questions, and link directly to your own internal policies or resources. The result is expert-quality training that feels like it was built specifically for your organization.

BizCreate: Your Knowledge, Turned Into Engaging Training – Fast

Some training can only come from you- your workflows, onboarding, or policies. BizCreate is BizLibrary's AI-powered content creation tool that transforms your materials into engaging, ready-to-assign courses. No outside resources needed.

BizCreate: AI-Powered Custom Content

Content creation has always been the bottleneck – time-consuming, expensive, and dependent on resources most teams don't have. BizCreate was built exactly for that. Start with a PowerPoint, a script, or a URL – and quickly receive a review-ready training video that you can review, refine and publish directly in BizLMS. No production team. No specialized skills. No extra budget. Just engaging learning content that reflects your organization.

BizCreate at a Glance

AI-Generated Storyboards, Ready for Review

Upload your source material and BizCreate produces a complete storyboard – scenes, voiceover, and visuals included. Helping you go from idea to publish-ready training in a fraction of the time.

Built-In Visuals and Media

BizCreate includes a built-in library of images, b-roll footage, and background music – so your content looks and sounds professional without any of the usual overhead.

Turn Static Content Into Engaging Learning

That PowerPoint deck sitting in your shared drive? It's already a training course. BizCreate converts your existing materials into engaging video-based learning that employees actually watch, retain, and apply on the job.

Ready to Deploy in Minutes

The moment you publish, your course is live in BizLMS- so you can roll out training immediately without exporting files, reloading content, or relying on a production queue.

Built for Speed, Consistency, and Flexibility

Make updates the moment policies change- so learners always have accurate, current information without waiting on a vendor or production queue.

How It Works

1

Upload Your Source Material

Add a PowerPoint presentation, a written script, or a URL. Select your preferred AI voiceover to match your content's tone.

4

Publish and Assign

Publish in BizLMS and assign it like any other asset- individually, through a learning initiative, or via a playlist.

2

AI Generates Your Storyboard

BizCreate drafts a complete storyboard—scenes, visuals, and voiceover—giving you an editable draft to fine-tune.

3

Refine and Personalize

Edit text, swap visuals, adjust scenes, and update background music to align with your brand and messaging. No technical skills required.
