

# Configuring SCIM with Okta

*This integration with Okta is currently under development and is not available to customers yet.*

## Features

The BizLibrary integration with Okta enables admin to take advantage of several features.

### Create Users

Users who have not already been created in BizLibrary will be created upon application assignment. Once a user is assigned, the user is created and is able to log in, once the update time has passed.

### Update User Attributes

User attributes can be updated from Okta to BizLibrary by changing attributes of assigned users. These user attributes will be stored and updated in BizLibrary.

### Deactivate Users

Users who are unassigned from BizLibrary within Okta will be deactivated in BizLibrary. Deactivated users do not count towards your licensed user allotment.

### Push Groups

Currently, BizLibrary supports pushing groups to BizLibrary from Okta. At the moment, the groups are only stored. In the future, SCIM groups will likely be used as an attribute for the team rule engine.

## Requirements

Currently, SCIM provisioning is available to any organizations who have SAML enabled in their tenant. To add SAML to your tenant, please contact your Client Success Manager, or BizLibrary Support at [support@bizlibrary.com](mailto:support@bizlibrary.com) or 888-315-8707.

## Step by Step Configuration Instructions

To configure SCIM for your BizLibrary account, follow these steps:

## Step by Step Configuration Instructions

To configure SCIM for your BizLibrary account, follow these steps:

1. Ensure that Application username format is mapped to Email on the Sign On application tab in Okta.

### Credentials Details

Application username format

Email

2. Contact your Client Success Manager of BizLibrary Support at [support@bizlibrary.com](mailto:support@bizlibrary.com) or 888-315-8707.
3. Request a SCIM Base URL and Authentication Token.  
*Do not share your Authentication to anyone outside your organization.*
4. On Okta, navigate to the BizLibrary application, then open the provisioning tab.  
Add the SCIM base url to your Okta account.  
Add the authentication token to your Okta account.
5. If you run into issues if you run into issues authenticating, please contact BizLibrary support at [support@bizlibrary.com](mailto:support@bizlibrary.com) or 888-315-8707.

## Update Time

If you do not see the intended updates in 24 hours, please contact your internal IT department or BizLibrary Support at [support@bizlibrary.com](mailto:support@bizlibrary.com) or 888-315-8707
