BIZ ▶ LIBRARY

CONTENT APPLICATION

Managing and creating learning content just got easier! With BizLibrary's Content Application managing and creating learning content is a breeze! Clients can customize BizLibrary-produced content, create their own video lessons, and manage and download content with an easy-to-use interface.

Streamline Your Content Management and Build Content that Drives Utilization

Create video lessons

Upload video content and add additional source materials, interactions, quizzes, and even closed captions! With the create and customize features of the BizLibrary Content Application, SAML 2.0 authentication setup is required to ensure the security of your content.

Customize BizLibrary-produced content

Customize BizLibrary-produced content to give your learners a familiar learning experience as well as take advantage of tested and proven video lesson styles.
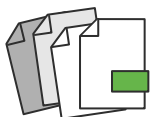

Curate for your needs

With this powerful application, you can seamlessly filter for, search, preview, download, and queue the content that best meets your needs.

Increase speed-to-training

By starting off with high-quality content, you can decrease the time it takes to develop content, and get your organization learning faster!

Create content consistency

When creating content, leveraging BizLibrary's content attributes like lesson titles, descriptions, interactions, and quizzes offers a more consistent learning experience for your organization.

Personalize the learning experience

Bringing in your company's own elements, like logos, and support materials, makes the overall experience more personalized to the learner.
