

BizConnect: Seamlessly Integrate Your Essential Systems with BizLibrary

BizConnect is an expansive integrations marketplace, designed to ease administrative burdens and remove barriers to learning.

Our wide range of integration capabilities help training administrators cut down on duplicated work, streamline existing processes, and scale their training faster.

Seamless Integration with Your Existing Systems: Managing your existing tech stack can be complicated enough. Our solution easily integrates with your existing systems so you have one less worry at work.

Wide Range of Integrations: BizConnect offers pre-built connectors with over 60 leading HRIS and payroll platforms, including popular systems like ADP, Workday, BambooHR, and Paylocity. We support content integrations including Cornerstone On Demand, SAP SuccessFactors, Schoox, Oracle, and more. Additionally, we can support integrations for other essential functions, including SSO, Microsoft Teams, and more. This broad compatibility allows clients to quickly integrate with their existing systems, enhancing data consistency and operational efficiency.

Types of Integrations Supported with BizConnect

HRIS/HCM: Simplify user management and synchronize data between systems through automated user provisioning, updating user profiles, role assignments, and deactivations.

- ▶ **Automated User Management:** BizConnect enables automated user creation, updates, and deactivations. This ensures that as employees are added, removed, or change roles, their learning paths and access within BizLibrary can be automatically updated, reducing manual input and error.
- ▶ **Seamless Data Sync:** With synchronized data flows, BizConnect ensures that employee information, such as department and role, is continuously updated between the HRIS and the LMS. This data sync enables personalized learning experiences that align with real-time organizational changes and evolving employee development needs. This can lead to faster onboarding for new employees or employees who move to different roles and/or departments.
- ▶ **Customizable Integration Settings:** BizConnect offers customizable sync settings, allowing organizations to select which data fields are shared and when updates occur. This flexibility helps maintain compliance with data privacy regulations and aligns with organizational needs.
- ▶ **Share your data securely:** Our integrations are built in accordance with the industry's highest standards of security and privacy, including SOC 2, Type II, ISO 27001, HIPAA, & GDPR.

Content Integrations with Other Learning Management Systems: Enable clients to use BizLibrary's award-winning, high-quality, and expansive content within other LMS platforms. LMSes we connect with are Cornerstone On Demand, SAP SuccessFactors, Schoox, Oracle, Absorb and more. Additionally, in early 2025 we will be joining the Workday Cloud Connect for Learning which will allow learners to directly access BizLibrary content.

- ▶ **Access to over 10,000 titles:** BizLibrary offers content that fits the needs of L&D professionals and learners no matter what they are looking for. L&D professionals can find content on compliance, leadership, and upskilling and reskilling - all easily assigned. Additionally, learners are able to take their development into their own hands by seamlessly accessing the content available to them.
- ▶ **Automatic New Content Additions:** After releasing new titles into the BizLibrary Collection, the integration connector talks to the two systems and reflects changes, like new content, so administrators and learners never have to miss a lesson.

Team Productivity: Share favorite content with coworkers easily by sending them through favorite messaging applications, like Microsoft Teams and more.
